SUMMARY

Passionate Associate Software Developer with 1+ year of experience in full-stack web development using React.js, TypeScript, and Node.js. Expertise in API integration, Redux, and Saga for seamless data flow. Proficient in backend technologies and containerization, ensuring scalable and reliable deployments

EDUCATION

• **Hemwati Nandan Bahuguna Garhwal University(A Central University)** *2023*
  B.tech in Information Technology 7.0

• **St.Theresa's Convent School Srinagar,Garhwal** *2019*
  Indian School Certificate Examination(12th), ISCE 82.00%

EXPERIENCE

Evon Technologies *Aug 2023 - Present*
Associate Software Developer Dehradun
- Engineered and maintained scalable web applications using the MERN stack.
- Conducted weekly client demos, showcasing new features and updates as per Sprints.
- Collaborated with cross-functional teams, third-party integrations, providing inputs in development, to ensure timely project delivery and seamless integration.
- Optimized data flow and application performance by implementing Redux Toolkit and Saga for efficient state management.
- Ensured code quality and streamlined development processes through continuous integration and deployment (CI/CD) practices.

Behere Elite Technologies Private Limited *Nov 2022 -Feb 2023*
Web Developer Inter(Full Stack) Delhi
- Co-developed a scalable e-commerce platform by integrating APIs to dynamically render content from a MongoDB database, enhancing the user experience with real-time data updates.
- Implemented component-based architecture in React.js to create efficient, reusable, and maintainable code, leading to faster development cycles and easier scalability.
- Utilized a comprehensive tech stack: React.js, Redux, Material-UI, MongoDB, Node.js, Express.js, REST APIs, and GitHub, to build and manage a robust, high-performing web application.

PERSONAL PROJECTS

• **My Portfolio** *Feb 2022- March 2022*
  This is a cutting-edge portfolio web application, showcasing my skills, all live projects, and coding profiles.
  − Tech Used - HTML, CSS, React.js, Material-UI, Vercel
  − Link - **https://portfolio-one-sand-40.vercel.app/**

• **Personal Task Manager** *May 2022- June 2022*
  This application will help the users to track their goals like time spent in a particular task.
  − Features of the app are create, update, edit and delete goals. Add labels to goal, Start a timer to track the time spent for goal, timer keeps running even when the window is closed
  − Tech Used - HTML,CSS,React.js, Redux,Material-UI,Vercel,Web Hosting
  − Link - **https://imaginative-haupia-00def5.netlify.app/**

• **Jobs API** *Feb 2023- March 2023*
  The project aimed to develop a modern blog application using ReactJS.
  − The Job API project is a robust RESTful API built with Node.js, designed to manage job postings, applications, and user authentication. This project leverages Express.js for the server framework, MongoDB for the database, and integrates Swagger for API documentation and testing. Authentication is handled using JSON Web Tokens (JWT) to ensure secure access to the endpoints.
  − TechStack used - JavaScript, MongoDB, NodeJs, ExpressJs, RestApi, and Github.
